

**NEW**

**CellGenix® TCM  
GMP-Prototype**  
Serum-free Medium, Xeno-free  
Optimized for T cell expansion

*For preclinical ex vivo use*

Expiry: 06-2025  
Volume: 500 ml  
Cat. No.: 24874-0000  
Lot No.: 2484X

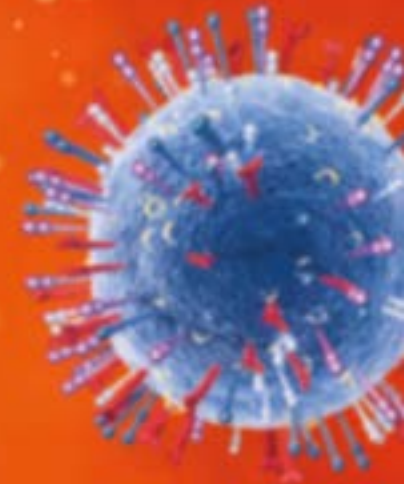

Storage: +2°C to +8°C  
Protect from Light

Product of US

## CellGenix® T Cell Medium GMP-Prototype

- Serum- and xeno-free medium
- Exceptional performance with no need to add serum
- High T cell yield early on
- Promotes an early-differentiated phenotype

# CellGenix® T Cell Medium GMP-Prototype Serum-free and Xeno-free Medium

500 ml bottle - Order No.: 24814-0500

## Product Characteristics

<b>Features</b>	<ul style="list-style-type: none"><li>• Improves consistency and eliminates serum associated risks</li><li>• Speeds up your process due to a high cell yield early on</li><li>• Promotes stem cell memory and central memory T cell phenotype</li><li>• Supports a high proportion of cytokine producing cells including polyfunctional cells</li></ul>
<b>Application</b>	<ul style="list-style-type: none"><li>• Serum-free expansion and cultivation of T cells</li><li>• Optimized for and verified with CAR T cells</li><li>• Supports expansion of other cell types such as Treg and iNKT cells</li></ul>

Save time and obtain optimal T cell expansion using CellGenix' T Cell Medium in combination with the G-Rex® platform:

- High T cell yield and viability
- Very low expression of exhaustion marker PD-1
- Low maintenance T cell culture (no need to re-add IL-7/IL-15)
